DIGITAL TRACK · TRACK A · PROJECT UDYAM DIGITAL

Udyam Express

From 'what do I need?' to 'it's live' in one phone session, for India's small businesses

Team Hopeful · NSUT
Anshul Dhoptey · Shiyon Tom Sherin

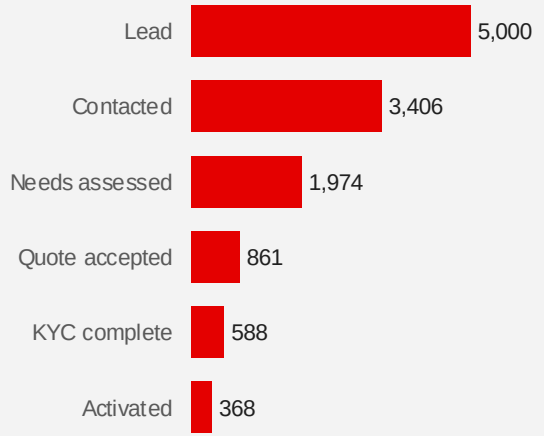

Platform Partner unstop

Only 7 in 100 SMB leads go live, and 73% of the 17.6-day wait happens before anyone installs anything

Accel Business SMB funnel, one quarter (Apr–Jun 2026), 5,000 leads

Where 5,000 leads go

Step pass rate: 68% · 58% · **44%** · 68% · 63%

Where they die (leads lost, top reasons)

Step	Lost	Top reasons
Lead → contact	1,594	Unreachable 805 · not interested 470 · wrong number 319
Contact → needs	1,432	**No time for a visit 531 · visit never scheduled 296**
Needs → quote	**1,113**	**Price 414 · competitor 207 · too complex 206 · too slow 179**
Quote → KYC	273	Missing GST/Udyam 94 · paperwork 79 · signatory 53
KYC → live	220	Install > 21 days 98 · cancelled 53 · not feasible 41

The owner's experience

17.6
days to go live
12.8 before install

3.0
status chases
per customer

₹15k
cost to acquire
per activation

−25
NPS
activated base

Field visits, a PDF quote and paper KYC: a journey built for corporates, sold to a kirana owner.

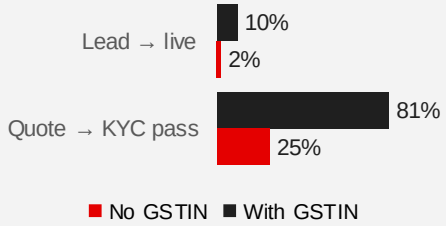

SO WHAT **Owners want these products; the journey loses 93 in 100 of them. Udyam Express lifts conversion to 13.8% and cuts CAC to ₹7.1k (Base case).**

Source: smb_leads.csv (5,000 leads, synthetic case data); team analysis. Stage days = mean for the 368 activated customers. NPS = % promoters (9–10) minus % detractors (0–6).

Root cause: a GSTIN wall, a confusing quote and silent installs, and micro customers lose money on every sale

Four leaks explain most of the loss, and every one of them is a digital-journey problem

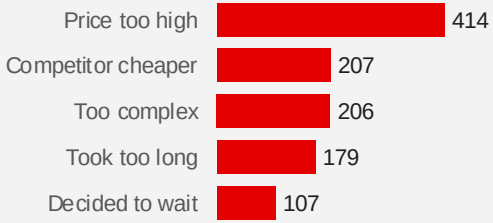

S1 · No GSTIN, no sale: KYC is a wall

≈3.8× higher odds of activating with a GSTIN, other factors held equal

47.5% of firms under ₹40 lakh turnover have no GSTIN; many sit below the GST threshold, yet KYC asks for one

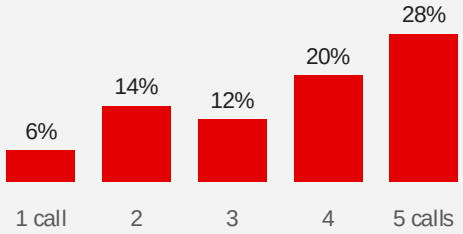

S3 · The quote leaks 1,113 leads

Only 44% pass from needs to quote, the steepest step

Regional-language leads pass the quote at 39.9% vs 45.4%

S5 · Every status chase raises churn

+0.33 log-odds of churn per chase, segment held equal (p = 0.014)

NPS falls from −3 (1 call) to −63 (5 calls)

S6/S7 · Micro loses money; compliance has holes

Segment	Share	CAC	ARPU/ mo	LTV/ CAC
Micro	54%	**₹20,007**	₹2,505	**0.9×**
Prof. offices	25%	₹10,695	₹6,796	6.1×
Multi-site + mfg	21%	₹15.5k	₹19.9–31.2k	15–21×

22 customers activated on a cancelled or suspended GSTIN

15% of bundles break a catalogue rule

₹53k field-sales CAC on micro

SO WHAT — **Fix the journey and micro flips from value-destroying (0.9×) to 4.5× LTV/CAC, while the compliance holes close.**

Source: smb_leads.csv, mock_gstin_registry.csv, product_catalogue.csv; team analysis. GSTIN odds ratio from logistic regression controlling for segment, source, tier, turnover, language (≈3.7–3.9×). LTV at an assumed 40% contribution margin, 36-month cap.

Udyam Express takes an owner from 'what do I need?' to 'it's live' in one phone session

Four digital steps remove the drop reasons behind 2,800+ lost leads; people step in only where a visit pays

1 Advisor

WhatsApp / app, 10 languages

- 5 questions, no visit
- Eligible bundles only
- OTP-verified number

Removes: no-time-for-visit 531, visit not scheduled 296, unreachable 805

2 Quote & checkout

One monthly price

- Add-ons switch on/off
- Instant, plain language
- UPI Autopay

Removes: too complex 206, too slow 179, price shock 414

3 Smart KYC

Minutes, not days

- GSTIN + Udyam lookup
- OCR + tamper checks, e-sign
- Lawful GST-free path

Removes: missing docs 94, paperwork 79, mismatch 47, signatory 53

4 Tracker

Install slot + live status

- Push updates at each step
- 5G FWA if fibre fails
- No need to call

Removes: install > 21 days 98, cancellations 53; 3 chases → ≤ 1

Who first (Q1)

#	Segment	Mode
0	Existing Accel customers (38% of leads, convert 1.5×)	Cross-sell
1	Professional offices + micro (79%)	Fully digital
2	Multi-site + manufacturers (21%)	Assisted

Starter bundles (catalogue-priced)

Bundle	₹ / month	GSTIN?
Dukaan Entry (AirFiber + postpaid)	1,198–1,498	No
Dukaan Starter (fibre, POS, Wi-Fi)	2,296–3,096	No
Clinic & Office Pro	4,016–5,191	No
Factory Connect / Multi-site	14k–41k	Yes

People where they pay (Q4)

Field sales: off micro (₹53k CAC); multi-site and factories, from a propensity-ranked call list

Partners → Udyam Mitra: install and assisted sign-up; paid on every activation in their pin code

Inside sales: KYC exceptions and hand-offs

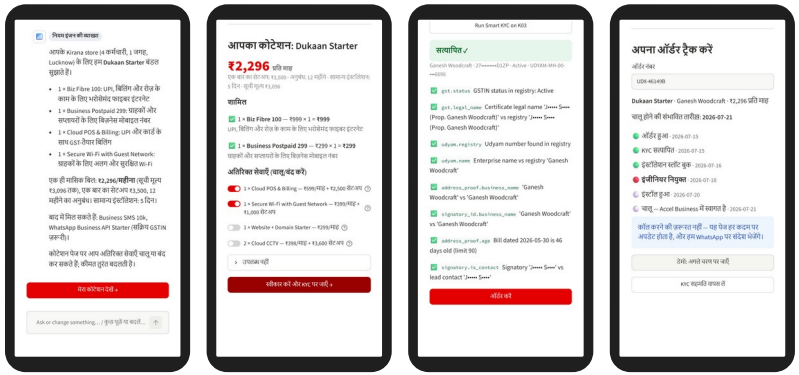

SO WHAT **Digital for the 79%, a visit only where it pays: the same journey serves self-serve owners, partners and field reps.**

Source: product_catalogue.csv (catalogue price ranges, eligibility rules checked); smb_leads.csv. Drop counts are leads lost to the reasons each step removes.

Prototype: the advisor recommends only bundles an owner can legally buy, and Smart KYC flags all 8 problem files

Built on the case pack: mock GSTIN and Udyam APIs backed by the registries; every price from the catalogue

The journey on a phone, in Hindi

1 Advisor · 2 Quote · 3 Smart KYC · 4 Tracker

Prototype screens · Hindi demo: kirana store, Lucknow, no GSTIN

15/15 advisor tests passed · 12/12 KYC verdicts match
Code: github.com/Spectre-anshul/Airtel-Sync-2026

Architecture: GenAI explains, the rules engine decides

Channels	Orchestrator	Services	Data
WhatsApp · RCS · web · partner app	LLM advisor + catalogue rules engine	GSTIN · Udyam · OCR · e-sign · quote · install	Consent store · masked logs · order DB

Smart KYC on 12 specimens (Q3)

Verdict	Applicants
Pass	K03 · K08 · K09 · K12
Auto-fixed	K02 skewed scan · K05 Udyam from registry
Re-capture	K04 blurred · K11 bill 257 days old
Reject / hold	K01 cancelled GSTIN · K06 GSTIN altered · K07 name altered · K10 wrong signatory

DPDP by design

- Consent screen before KYC; purpose stated
- Only the fields each step needs
- GSTIN, Udyam and phone masked in logs and UI
- Documents deleted after verification, except what DoT rules require
- Full DPDP duties live by 13 May 2027

SO WHAT — No quote can break a catalogue or KYC rule: the LLM talks, the rules engine prices, and every check is logged.

Source: team prototype; KYC results on the 12 specimen applicants (K01–K12), checked against mock registries with today = 15 Jul 2026. Screens captured from the running prototype; 15 advisor test scenarios in app/tests/test_advisor_scenarios.py.

Others sell a product online; Accel sets up the whole business, verified and live, in under a week

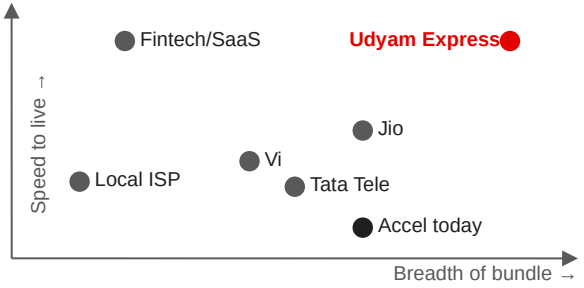

Capability comparison for India's SMB connectivity buyer (indicative, from public sources)

Capability matrix ● strong ◖ partial ○ absent

Capability	Accel today	Jio Business	Vi Business	Tata Tele	Local ISP	Fintech / SaaS	Udyam Express
One bundle, one bill	○	◖	◖	◖	○	○	●
Self-serve needs discovery	○	◖	◖	◖	○	●	●
Vernacular journey	○	◖	◖	◖	●	◖	●
Instant registry KYC	○	?	?	?	○	◖	●
Order tracker	○	◖	◖	◖	○	n/a	●
Trust / anti-fraud layer	◖	◖	◖	◖	○	◖	●
Physical install reach	●	●	◖	◖	●	○	●

? = not publicly verifiable. Fintech/SaaS = PhonePe Business, Zoho, Razorpay. PhonePe launched digital Udyam Assist registration with SIDBI in Sep 2025.

Where players sit

Threats and our answer

Price-led bundles (Jio): answer with a ₹1,198 entry pack and add-ons, not discounts (621 leads lost on price)

Fintechs own the Udyam moment: partner with them as distribution in Phase 3

SO WHAT **Accel can win on breadth, trust and speed, backed by network fraud signals, install reach and pin-code partners that online rivals lack.**

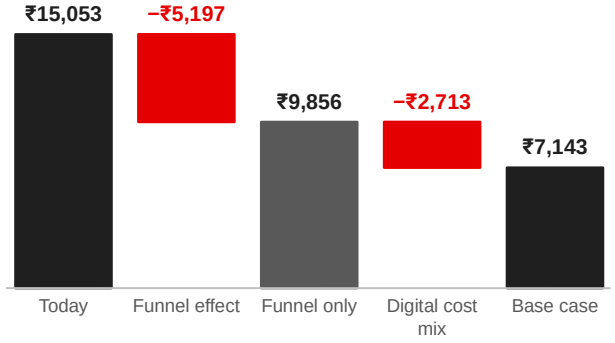

Source: TelecomTalk (Jio Business Broadband Max 801, 13 Mar 2026; Vi Business MSME MoU, 5 Aug 2026); PhonePe press release (digital Udyam Assist registration with SIDBI, 10 Sep 2025); Airtel press release (IQ Gateway, 5 Oct 2026); team assessment. Ratings are indicative.

Base case: 87% more activations, 53% lower CAC and +₹14.6 cr retained ARR from the same leads

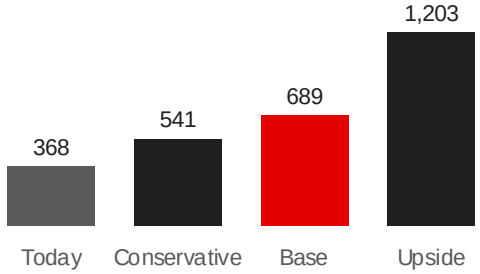

One quarter of 5,000 leads; each drop reason is recovered at a judged rate, then haircut by a scenario factor (0.3 / 0.5 / 1.0)

13.8%	₹7,143	≤ 7 days	−28%	+₹14.6 cr
lead → live	**CAC**	**target to go live**	**churn, every segment**	**retained ARR / yr**
from 7.4%	from ₹15,053	from 17.6 (single site)	15.2% → 11.6% blended	₹19.3 → 33.8 cr

CAC bridge: what is earned vs assumed

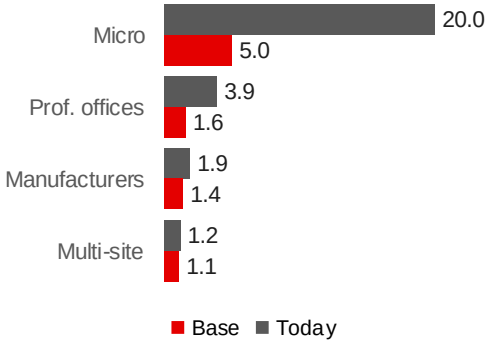

Activations by scenario

CAC: ₹15.1k · ₹8.3k · ₹7.1k · ₹5.2k

Conversion: 7.4% · 10.8% · 13.8% · 24.1%

CAC payback (months): today vs Base

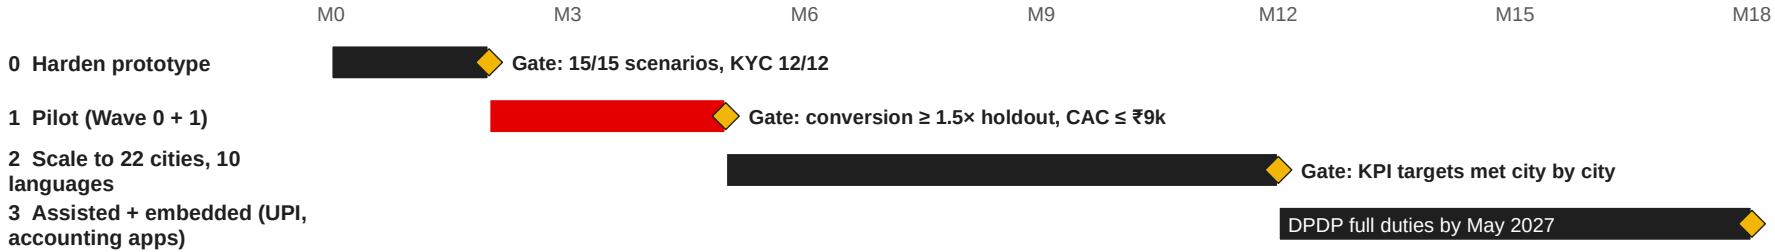

SO WHAT — **Even the Conservative case pays: 47% more activations at 45% lower CAC. Micro alone moves from 0.9× to 4.5× LTV/CAC.**

Source: Udyam_Digital_Model.xlsx (Scorecard, Sensitivity); smb_leads.csv. Assumptions: 40% contribution margin; ₹30 advisor and ₹50 KYC cost per lead; partner commission 1.5× MRR as today; churn ×0.72 from a segment-controlled logit (chases 3 → 2). ARR = 4 quarterly cohorts × 12, net of 6-month churn.

Pilot in 4 cities against 4 holdouts, scale to all 22 cities in 12 months, and be DPDP-complete before May 2027

A gated rollout: each phase starts only when the previous gate's numbers are met

Roadmap (months)

Five metrics, 12-month targets (Q5)

Metric	Today	Target
Lead → live	7.4%	≥ 13%
Days to go live	17.6	≤ 7
CAC per activation	₹15,053	≤ ₹7,500
6-month churn	15.2%	−25% / segment
Status chases (guardrail)	3.0	≤ 1

Governance

Monthly steering: Head of SMB (chair), CDO, CISO/DPO, Channel, Finance; owns gates and price floors

Owners: product → KPIs; DPO → consent; Channel → partner policy

Top risks → mitigation

Wrong AI price → catalogue-only pricing, tests every release
Forged KYC → registry + checksum, humans on Red
Partner backlash → pin-code commission
Tier-2 installs → feasibility check, 5G FWA fallback

SO WHAT

The ask: 4 pilot cities, GSTIN and Udyam API access, and sign-off on the partner policy. Every phase is gated on measured results.

Source: team plan; DPDP Rules 2025 timeline (consent managers from 13 Nov 2026; full obligations 13 May 2027). Pilot cities: Delhi and Bengaluru (Tier 1); Lucknow and Vadodara (lowest-converting Tier 2).

Appendix A1 · Twelve signals planted in the leads data, and what each changes

#	Signal	Evidence	Design response
S1	GSTIN is the KYC wall	9.6% vs 2.0% conversion; quote → KYC 80.6% vs 24.7%; odds ≈ 3.7–3.9×	Registry lookup + GST-free path
S2	Wait is before install	12.8 of 17.6 days before installation	Digital contact, quote, KYC
S3	Quote is the leak	1,113 drops; 44% pass	Instant single price + toggles
S4	Visits kill deals	827 drops: no time 531, not scheduled 296	No-visit advisor
S5	Chases predict churn	5.9% → 27.9% churn (1 → 5 calls); p = 0.014	Tracker
S6	Micro loses money	CAC ₹20,007, ARPU ₹2,505, LTV/CAC 0.9×; field micro CAC ₹53,026	Digital only, entry pack
S7	Compliance holes	22 live on cancelled/suspended GSTIN; 21 GSTIN-only sales without one; 15% break rules	Rules engine + live status
S8	Installed base converts ~2×	Prof. offices 15.3% vs 8.4%; multi-site 15.4% vs 8.3%	Wave 0 cross-sell
S9	Micro price shock	Median spend ₹900/month vs ₹2,300+ starter	₹1,198 entry pack
S10	Leaky digital capture	WhatsApp leads 2.8%; 30.7% unreachable, 12.0% wrong numbers	OTP / silent auth
S11	Vernacular gap	Regional 6.2% vs 8.0%; quote 39.9% vs 45.4%	10-language journey
S12	Tier-2 install; costly partners	KYC → live 51.8% vs 72.7%; partner cost = ₹900 + 1.5× MRR	FWA fallback; Udyam Mitra

Source: smb_leads.csv, registries, product_catalogue.csv; team analysis, independently recomputed. Effects are raw gaps unless noted.

Appendix A2 · How the impact model works, and every recovery assumption

Method

- Map each of 20 drop reasons to the step that removes it
- Set a recovery rate at full effect
- Multiply by a scenario factor: 0.3 / 0.5 / 1.0
- Rebuild each segment funnel: pass = (passed + recovered) ÷ entering
- Conversion = product of the 5 pass rates
- CAC = lead cost + ₹30 advisor + ₹50 KYC + partner commission; assisted segments keep field and partner costs
- Churn × 0.72 (chases 3 → 2), from a segment-controlled logit
- LTV at 40% margin, 36-month cap (sensitivity 30–50%)

Drop reason	Leads	Recovery
Unreachable after 3 attempts	805	30%
Owner had no time for a visit	531	50%
Not interested on first call	470	10%
Price too high	414	20%
Locked in with provider	325	0%
Wrong or invalid number	319	0%
Visit not scheduled by sales	296	70%
Only wanted a mobile plan	280	0%
Competitor cheaper	207	15%
Quote too complex	206	70%

Drop reason	Leads	Recovery
Quote took too long	179	85%
Decided to wait	107	10%
Installation > 21 days	98	50%
Missing GST/Udyam doc	94	60%
Paperwork too long	79	70%
Signatory not available	53	60%
Cancelled before install	53	30%
Document mismatch	47	50%
Site not feasible for fibre	41	60%
First payment failed	28	60%

Source: Udyam_Digital_Model.xlsx (Assumptions, Uplift Model). Recovery rates are team judgement at full effect; the Base case applies 50% of each. "Only wanted a mobile plan" and wrong numbers are not counted as recovered.

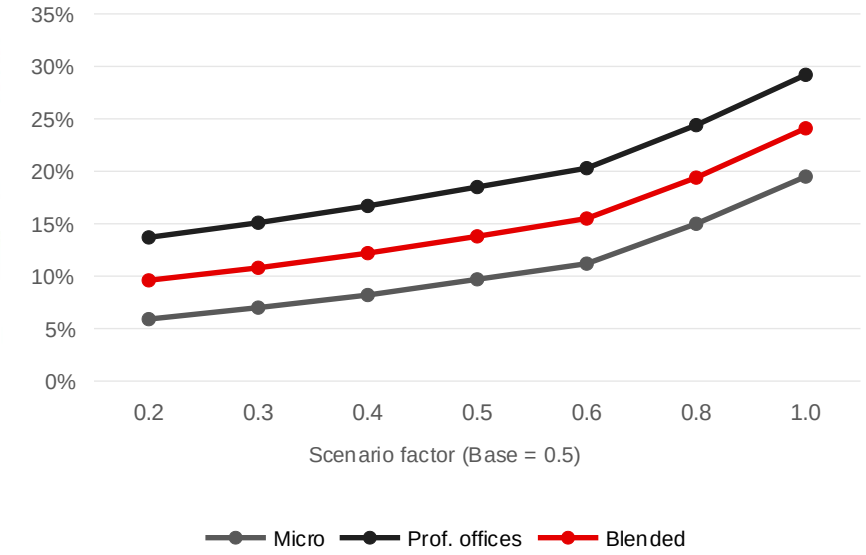

Appendix A3 · Smart KYC answer key: 12 specimen applicants

ID	Business	Verdict	What the checks found	Action
K01	Vindhya Tours & Travels	**Reject**	GSTIN cancelled in registry; Udyam number blank (lead has no Udyam)	GST-free path; human review
K02	Harmony Dental Care	**Pass (fixed)**	Skewed scan; matches registry after deskew	Auto-deskew
K03	Ganesh Woodcraft	**Pass**	Consistent with both registries	None needed
K04	Saffron Dental Care LLP	**Re-capture**	GST certificate too blurred to read	New photo or GSTIN lookup
K05	Balaji Realty LLP	**Pass (fixed)**	Udyam certificate missing; found in registry. "Owner" for an LLP	Auto-fill; confirm partner by e-sign
K06	Saffron Unisex Salon	**Reject**	GSTIN fails checksum; 8189 vs registry 5189	Tamper flag; human review
K07	Neelgiri Physio Clinic	**Reject**	Legal name "Shri" vs registry "Neelgiri"	Tamper flag; human review
K08	Green Leaf Legal Associates	**Pass**	OCR O/0 confusion fixed by GSTIN position rule	None needed
K09	Kaveri Insurance Advisors	**Pass**	Consistent; bill 5 days old	None needed
K10	Kaveri Stays LLP	**Hold**	Signatory Nisha Arora ≠ owner Fatima Menon on lead	Partner authorisation + e-sign
K11	Trinity Bake House Pvt Ltd	**Re-capture**	Bill 257 days old (> 90); "Owner" for a Pvt Ltd	New bill; director authorisation
K12	Star Electronics	**Pass**	Consistent; bill 9 days old	None needed

Source: kyc_documents K01–K12, mock_gstin_registry.csv, mock_udyam_registry.csv; today = 15 Jul 2026. Udyam certificate dates and "major activity" are deliberately not matched: they differ from the registry on all 11 certificates.

Appendix A4 · Sensitivity: the case holds across scenario factors and margins

Lead → live conversion by scenario factor

LTV/CAC by assumed contribution margin (Base)

Margin	Micro	Prof. offices	Multi-site	Manufacturers
30%	3.4×	12.7×	19.2×	15.8×
40% (used)	4.5×	16.9×	25.6×	21.0×
50%	5.6×	21.1×	32.0×	26.3×

Propensity model: who to call first (AUC 0.71)

Top 30% of leads hold 53% of activations; the bottom 30% hold 8%

- Top-decile conversion 13.4% vs 1.4% in the bottom decile
- Used for the field-sales call list in Wave 2

Source: Udyam_Digital_Model.xlsx (Sensitivity). Scenario factor = share of each full-effect recovery rate achieved. LTV/CAC at Base funnel and cost.

Appendix A5 · Sources and data notes

Fact used	Source (checked 8 Nov 2026)
All funnel, KYC, catalogue and economics figures	Airtel SYNC case pack: smb_leads.csv, registries, product_catalogue.csv, kyc_documents (synthetic); Udyam_Digital_Model.xlsx
Udyam + Udyam Assist: over 7.9 crore enterprises (May 2026)	IANS, 14 May 2026
Active GST taxpayers 1.67 crore (30 Jun 2026); 76.9% proprietorships	GSTN, "9 Years of GST" report
DPDP Rules: consent managers 13 Nov 2026; full obligations 13 May 2027	Legal500 and law-firm notes on DPDP Rules 2025
IQ Gateway with IQ Verify fraud scoring (5 Oct 2026)	Airtel press release
Jio Business Broadband Max 801 bundle (fibre + JioMeet / JioAttendance / JioGate)	TelecomTalk, 13 Mar 2026
Vi Business ReadyForNext: ~2.5 lakh MSMEs engaged	TelecomTalk, 5 Aug 2026
PhonePe launched digital Udyam Assist registration with SIDBI	PhonePe press release, 10 Sep 2025
15% of 30 mn formalised small businesses sell online	Bain & Meta, Win with Conversations, May 2024

Data notes: Accel Telecom is fictional and all case data is synthetic. Contribution margin (40%) and per-lead tool costs are team assumptions, tested in A4.
